

UNIT 3 — ATOMS, ELEMENTS, MOLECULES

L9: Yours
Periodically

GUIDING QUESTION: WHAT DO PERIODIC TRENDS ALLOW YOU TO BE ABLE TO DO?

Do Now: List some objects or groups of objects that can have trends to them (something increases about them while a lot of things stay the same). You may consider drawing them as well.

NOTES

Similar to what you just did, scientists over the centuries took the elements of the Periodic Table and arranged them in specific groups based on similarities and trends.

NOTES

The Periodic Table we use today is not the first to exist.

We will see why it has persisted beyond previous versions in the future.

CLOSURE

- Respond to Guiding Question
- Homework 11 due Friday, 12/1
- Achieve 3000: Throw Old Computers in the Trash?
No Way! due Friday 12/8 at 11:59pm
